Our initiatives to decarbonize natural gas

Initiative for Responsible Procurement of Natural Gas

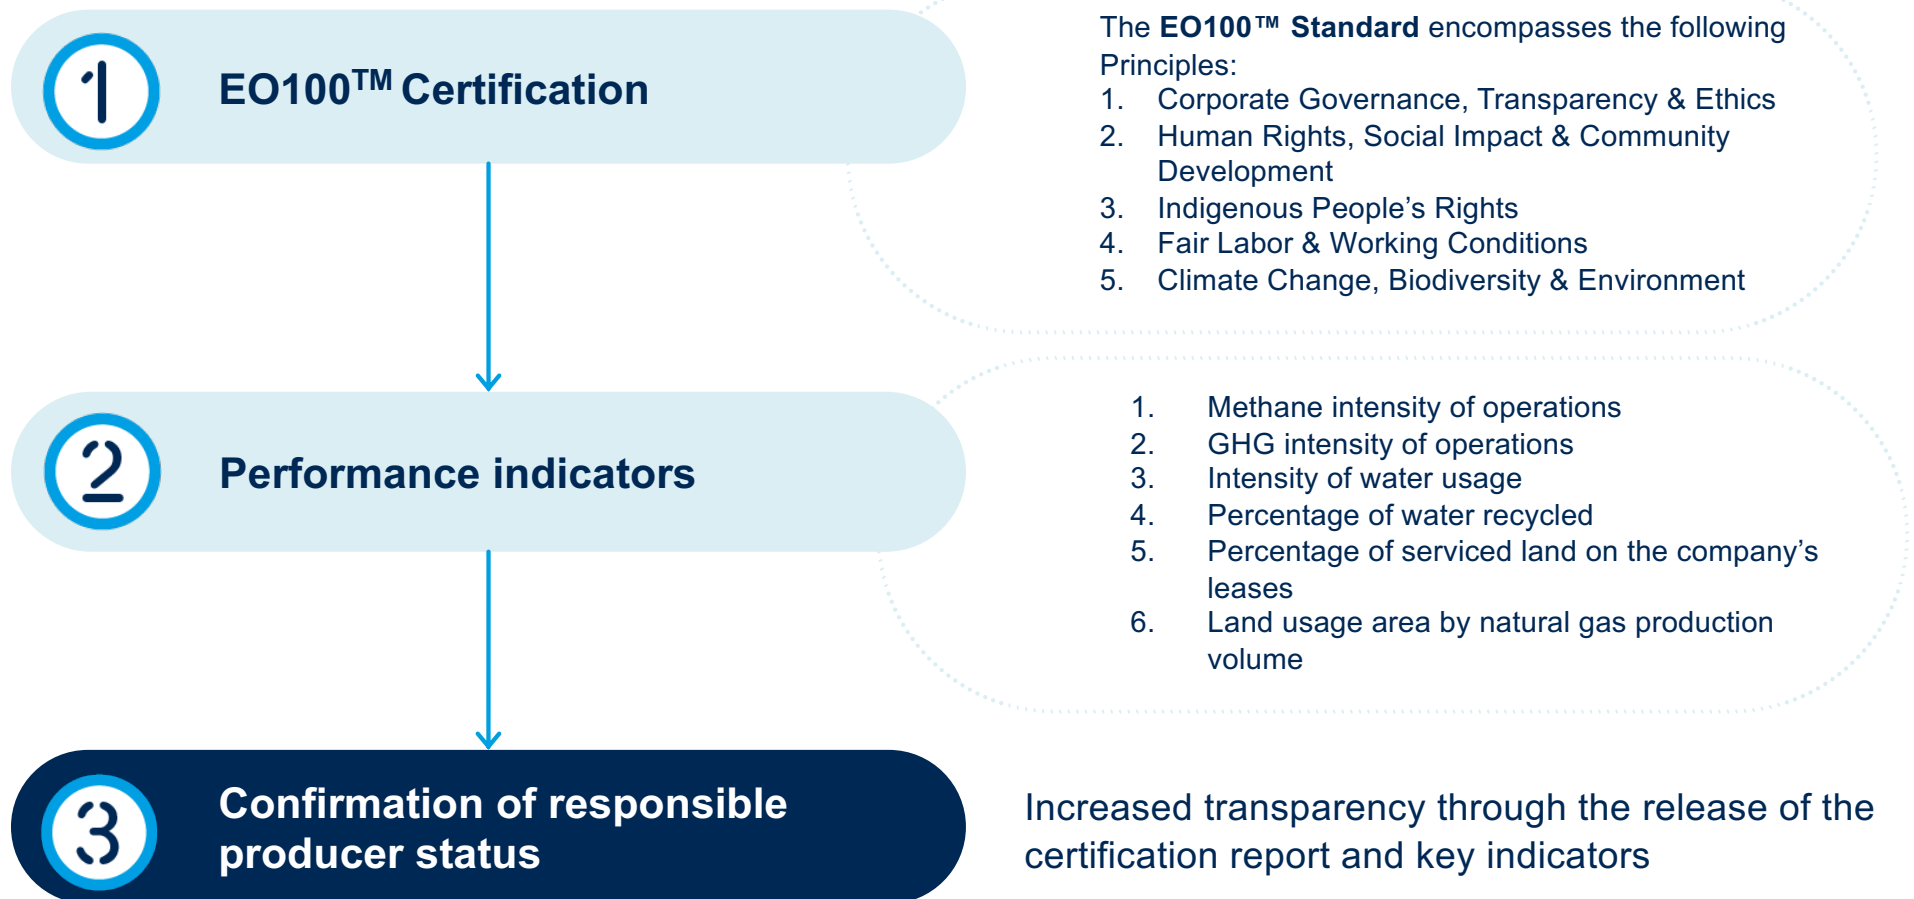

Énergir's initiative aims at reducing the environmental footprint of the natural gas we distribute.

This initiative has two goals:

1. Buy from specific producers so that our natural gas supplies are easier to track; and
2. Buy from producers that have adopted some of the best ESG practices to reduce the impacts of their operations.

Eligibility process

RSG transactions carried out through our Initiative

First transaction: February 2020

Second eligible producer: August 2021

Climate metrics and targets

Énergir's Metrics and Targets

Indicateur	Mesure 2020	Cible d'Énergir 2030
1 Direct emissions from Énergir's activities: ¹ e.g., fugitive emissions, combustion, fleet. Indirect emissions from Énergir's activities: e.g., electricity use	<ul style="list-style-type: none"> • Direct Emissions (Scope 1): 54,605.8 tonnes CO₂ eq. in 2019; • Indirect Emissions (Scope 2): 16.2 tonnes CO₂ eq. in 2019; • Total Emissions: 54,622 tonnes CO₂ eq. in 2019; • GHG Reductions: 22.1% reduction from 1990 levels. 	-37.5% by 2030, from 1990 levels.
2 Energy efficiency	<ul style="list-style-type: none"> • Annual reduction of 82,062 tonnes of CO₂ eq. in 2020 resulting from energy efficiency. • Énergir's energy efficiency program results achieved savings of 42.7 million cubic metres in 2020. 	1Mt in GHG reductions between 2020 and 2030.
3 RNG	<ul style="list-style-type: none"> • 0.1%: Percentage of RNG volumes injected into our gas network in 2020. • Annual reduction of 12,408 tonnes of CO₂ eq. for customers who consumed RNG in 2020. 	10% of RNG injected by Énergir, or 430 Mm ³ and 1Mt of reductions in 2030.
4 Responsible Procurement of Natural Gas Initiative	<ul style="list-style-type: none"> • 15% of network gas in 2020 was purchased as part of this initiative. 	100% of fossil natural gas supplies contracted by Énergir as part of the Responsible Procurement of Natural Gas Initiative.
5 Complementarity/ Bi-energy ²	<ul style="list-style-type: none"> • GHG reductions related to bi-energy conversion efforts. 	0.5 million tonnes of GHG reductions by 2030.
6 Overall GHG reductions in the building sector ²	<ul style="list-style-type: none"> • Annual overall reductions in the building sector in 2020. 	30% reduction in Énergir customers' GHG emissions in the building sector by 2030 compared to 2020 levels.

1. Direct Greenhouse Gas Emissions (Scope 1) data include emissions that must be reported under the Mandatory Reporting regulations for certain emissions of contaminants into the atmosphere (RD0). To comply with the RD0, GHG declarations are based on the calendar year. That is why the 2019 data are presented in this report.
2. The information expected to be released in a future report.

Next steps

- Engaging proactive producers and other distributors to embark on the process to achieve eligibility.
- Continuing our responsible purchases through our Initiative during 2020-2021 and beyond.

Thanks!

Vincent Regnault
